<b>Office Action Summary</b>	Application No. 10/606,482	Applicant(s) MEHROTRA ET AL.	
	Examiner Jason L. Savage	Art Unit 1775	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL.                      2b) ☒ This action is non-final.

Art Unit: 1775

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-24, 48-49 and 52, drawn to a method, classified in class 264, subclass 604.
- II. Claims 25-34, drawn to an article, classified in class 51, subclass 307.
- III. Claims 35-41, 43, 50-51 and 53-54, drawn to an article, classified in class 51, subclass 293.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be produced by a materially different process such as by providing an uncoated ceramic cutting insert which has not been ground, heat treating the ceramic cutting insert and subsequently subjecting the cutting insert to a grinding process to form a heat treated, ground ceramic cutting insert.

Inventions I and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions differ in the claims of Group I is drawn to a process for forming a ground cutting insert by heat treating wherein the article of Group III is drawn to a ground cutting insert which is formed in the presence of a reaction source comprising a substrate which defines a rake face and flank face having a cutting edge

at the intersection of the faces; further wherein the substrate has a surface and bulk area regions having differing compositions.

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the inventions differ in the claims of Group II is drawn to an article comprising a ground cutting insert which is formed by heat treating wherein the article of Group III is drawn to a ground cutting insert which is formed in the presence of a reaction source comprising a substrate which defines a rake face and flank face having a cutting edge at the intersection of the faces; further wherein the substrate has a surface and bulk area regions having differing compositions.

Because these inventions are distinct for the reasons given above and the search required for any one of Groups I-III is not required for any other Group, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
